

Agustín Lannoo

Data Analyst & Business Intelligence Engineer

Data Analyst with 5+ years of experience bridging business operations, ERP systems, and analytics. Specialized in Power BI dashboards, SQL data modeling, and reporting automation. Proven track record of cutting reporting time by 60% and delivering 15+ production dashboards across finance, sales, and operations.

EXPERIENCE

Jun 2023 – Present Brandteam · Buenos Aires

Data Analyst & BI Engineer

- Designed and deployed 15+ Power BI dashboards covering financial, commercial and operational KPIs — reducing weekly reporting time from 8 to 3 hours (60% efficiency gain).
- Built SQL pipelines and stored procedures for transactional ERP systems, ensuring pricing accuracy and financial integrity across thousands of daily orders.
- Designed and maintained ETL processes and dimensional models in the corporate data warehouse, enabling historical and predictive analysis.
- Developed Python automation scripts for recurring report generation and file processing.
- Coordinated end-user training and led the FreshDesk support team, driving digital adoption across business units.

2021 – 2023 Seidor Argentina · Buenos Aires

SAP Functional Analyst

- Configured and customized SAP Business One implementations for mid-market clients across multiple industries.
- Developed SQL queries and operational reports using HANA Studio and Crystal Reports.
- Led UAT cycles, functional documentation, and post-go-live support.

2019 – 2021 Intec Software · Buenos Aires

Business Analyst

- Supported SQL Server-based ERP implementations, covering data migration, reporting, and end-to-end testing.
- Documented business processes in Bizagi (BPMN) for client deliverables.
- Validated data quality across migrations and authored UAT test scripts.

FEATURED PROJECTS

Sales Management Dashboard

SQL Server · DAX · Power BI

Interactive commercial dashboard with multi-dimensional analysis (clients, sales reps, brands, regions) over 5 years of sales data.

github.com/Alannoo6/sales-management-dashboard

Business Performance Dashboard

SQL Server · Power Query · Power BI

Integrated financial and inventory model on a star schema, covering billing, collections, debt aging, and stock valuation.

github.com/Alannoo6/business-performance-dashboard

Price Recalculation Pipeline

T-SQL · ETL · Batch Processing

Transaction-safe stored procedure that recalculates pricing, taxes, and discounts for pending sales orders, preventing billing errors.
